(*) Requirement 5.5:

The facility discloses annual conflict minerals management performance through its public reports. However, the 2024 disclosure covered only 3TG (tin, tantalum, tungsten, gold) and did not yet include silicon, which was added to the Conflict Minerals list in 2025. While due diligence for silicon was completed in 2025 and relevant evidence was provided, public disclosure has not yet reflected this expanded scope.

(*) Requirement 13.24:

During the assessment, it was found that while the facility has systems in place to manage working hours and rest days, a portion of sampled records showed that some workers' total annual hours exceeded the limits set under the Comprehensive Working Hours Approval. By the time of the assessment, the facility had already acknowledged this issue and implemented corrective action measures such as monthly monitoring, annual reviews with management, and rotating rest arrangements to reduce excessive overtime, with clear targets set to ensure all workers remain within legal limits since the issue was detected.
