(*) Assessment Type

- **Initial Assessment** – A comprehensive assessment of a site against all SSI Standard (s) requirements, conducted to determine the level of compliance and to identify any non-conformances.
- **Follow-up Assessment** – A subsequent assessment conducted after an unsuccessful Initial Assessment, to verify that corrective actions have been implemented for non-conformances identified during the Initial Assessment.
- **Surveillance Assessment** – An interim assessment during the certification cycle to confirm ongoing compliance with the SSI Standard(s). It verifies closure of minor non-conformances and observations, reviews any scope changes (e.g. new production lines), and samples requirements to ensure no new risks or regressions have arisen.
- **Recertification Assessment** - An assessment conducted at the end of a three-year cycle that covers all current production lines and fully reflects any significant scope changes since the last full assessment.

Conformance Ratings

Conformance (C):

- Systems, policies, procedures, and processes performed in a manner that is in line with the intent of the SSI Standards.

Minor Non-Conformance (MiNC):

- An isolated lapse of performance or control.
- A breach which represents low risk to workers/those on site.
- A policy issue where there is no evidence of material breach.
- Policies or procedures that have been recently adopted but have not been in place or implemented for a sufficient period to demonstrate effective application.

Major Non-Conformance (MaNC):

- A systemic failure or total lack of required controls by the site.
- A total absence of implementation of the requirement.
- A breach of law.
- A group of related, repetitive, or persistent minor non-conformances indicating inadequate implementation.

Observation (O):

- A Conformance that meets the fundamental requirements of the SSI Standard(s) but needs improvement.
- If this improvement is not adequately addressed, the Observation could escalate to a Non-Conformance during the next Assessment.

Not Applicable (N/A):

- A requirement which cannot be implemented by a site due to the nature of its operations.

The Responsible Mineral Procurement Management Policy was updated to include silicon supply chains only in July 2025, shortly before the audit, despite silicon-related due diligence having been implemented earlier. This indicates a delay between operational practices and their formal reflection in corporate policy.
