#### (\*) Assessment Type

- **Initial Assessment** – A comprehensive assessment of a site against all SSI Standard(s) requirements, conducted to determine the level of compliance and to identify any non-conformances.
- **Follow-up Assessment** – A subsequent assessment conducted after an unsuccessful Initial Assessment, to verify that corrective actions have been implemented for non-conformances identified during the Initial Assessment.
- **Surveillance Assessment** – An interim assessment during the certification cycle to confirm ongoing compliance with the SSI Standard(s). It verifies closure of minor non-conformances and observations, reviews any scope changes (e.g. new production lines), and samples requirements to ensure no new risks or regressions have arisen.
- **Recertification Assessment** - An assessment conducted at the end of a three-year cycle that covers all current production lines and fully reflects any significant scope changes since the last full assessment.

### Conformance Ratings

#### **Conformance (C):**

- Systems, policies, procedures, and processes performed in a manner that is in line with the intent of the SSI Standards.

#### **Minor Non-Conformance (MiNC):**

- An isolated lapse of performance or control.
- A breach which represents low risk to workers/those on site.
- A policy issue where there is no evidence of material breach.
- Policies or procedures that have been recently adopted but have not been in place or implemented for a sufficient period to demonstrate effective application.

#### **Major Non-Conformance (MaNC):**

- A systemic failure or total lack of required controls by the site.
- A total absence of implementation of the requirement.
- A breach of law.
- A group of related, repetitive, or persistent minor non-conformances indicating inadequate implementation.

#### **Observation (O):**

- A Conformance that meets the fundamental requirements of the SSI Standard(s) but needs improvement.
- If this improvement is not adequately addressed, the Observation could escalate to a Non-Conformance during the next Assessment.

#### **Not Applicable (N/A):**

- A requirement which cannot be implemented by a site due to the nature of its operations.

**(\*) Requirement 5.4 and 5.5**

The Responsible Mineral Procurement Management Policy was updated to include silicon supply chains only in July 2025, shortly before the audit, despite silicon-related due diligence having been implemented earlier. This indicates a delay between operational practices and their formal reflection in corporate policy.

### (\*) Requirement 14.10

During the site inspection, operators performing soldering were not wearing the required heat-resistant gloves, despite this control being documented in the facility's Hazard Identification and Risk Control Measures List. This reflects a gap between documented safety measures and actual operational compliance.

### (\*\*) Requirement 14.13

During dormitory inspections, smoking was observed in hallways, causing unpleasant odours and suggesting potential ventilation issues.
